

Café: Our café features a large seating area inside and outside. During the summer and spring times the glass walls on the deck will open up and allow for a natural view into the rest of the park. Our café also has a central kitchen, a wash-room and a nice table and couch for indoor relaxation.

Our park design manages to include plenty of play space and sitting area for parents. We have our play park with a bridge and slide, but we also have our climbing wall and of course swings. We decided to include a large open space for general play such as tag or another game. This also means children on the swings will not hit or hurt any one because of the open space.

We decided to add a dog park being that the closest one is still quite far away. Our park design in general allows dogs as long as they are leashed but with this area owners can let their dogs off leash to run around and play. We also added a covered seating area for owners while their dogs run around. The dog park is fenced off to the rest of the park and we have double gates to allow ease of entry
